

DID YOU KNOW THIS?

Agmax Acid Sachets...

To compare Agmax acid powdered sachets with any other brand of liquid acid, check the use rate. Our use rate is 100g/100lt, while many others are 150ml/100lt. That is, when you use liquid acid, you use half as much product again. This is important, as it indicates the strength of acid sachets.

Features

- Agri Quality approved
- 100g /100lt use rate
- 100% Concentrate, not already diluted with water.
- Super low-foaming, superior cleaning and sanitising
- Economical - 20kg is equal to 30kg of other brands
- Effective in all water types

Benefits

- Superior cleaning and sanitising performance
- No spills or waste, less OSH issues
- Foolproof, easy to use and no measuring
- For use in hot or cold water, at the same concentration
- Sachets eliminate any issues with product contamination
- Easy to store
- Long shelf life
- No Drum pumps needed

Product Testimonial

“After trying to save money with cold water detergents and running a tight ship which I have today, I’m finding Agmax Acid Sachets the best thing out since PK chewing gum. Pre-measured and much stronger than competitors acid. Also no mess, no drums or drum pumps needed. Thank you Agmax.”

Geoff Giltrap – Otorohanga.
