Spring - bringing you bits and pieces

To begin, SPRING... What spring? We have never taken so many calls from our customers who have had enough of rain, rain, rain, wind, wind, wind and grey sky, grey sky, grey sky. It appears many parts of the country are water logged and we're all familiar with the issue that creates. We know we have no control over the pay out price, the world economy, the recession, natural disasters and of course the weather. However, we can't be blamed for wishing we could have an outstanding spring to set us up for a great season.

Agmax has developed and registered (ACVM) a brand new bloat product called BloatStop. (See the product feature on bloat.) This is a blend of pluronics which gives outstanding bloat protection for the stock and is inline dispenser and alkathene pipe friendly. It is a top of the range and state of the art product.

"Another One Bites The Dust"

is one of the rock band Queen's many immortal hits. It is also the best description for the demise of another New Zealand company FIL Industries. This was one of our few remaining New Zealand competitors who has been bought out by a multi national company GEA commonly known as Westfalia.

Agmax is still immensely proud of the fact that we are New Zealand born and bred have developed and grown in New Zealand and are still one hundred percent New Zealand owned and operated. In fact, we are celebrating our twenty second year in business this October.

Great news that Fonterra has announced this seasons final payout of \$6.35 per kg/MS with 0.35 of retained earnings. This is the second highest payout to date. So here's to hoping some debt equity gets paid off and that production is up so that all farmers can make the most out

of this seasons payout. One can only crystal ball gaze as to what next years seasons payout will be and what the world and New Zealands economy will be this time next year.

You'll see that all of our prices have been adjusted to accommodate the GST increase from 12.5% to 15%. Don't you just love it when all governments get you and I to do their work for them (no matter which one you support). Unpaid at that!

Make the most of the next few months before we send out our Christmas newsletter. And yes isn't it scary it's nearly another calendar year gone already or should I say "Another year bites the dust" Long live "Queen"

Love life

PRODUCT FEATURE

Which bloat product is best?

We're often asked which is the right bloat product for a particular situation. Outlined below are the benefits and highlights of each bloat product giving you a guide to determine which product is suitable for you along with some notes explaining the difference between the other three well proven bloat products and INTRODUCING a BRAND NEW fourth bloat product called BLOATSTOP

BLOATSTOP

BloatStop is a new bloat product we have added to our range. This is a blend of pluronics which gives outstanding bloat protection for the stock and is inline dispenser and alkathene pipe friendly this product can be drenched and troughed. It is a top of the range and state of the art product. It is a 4ml dose rate in normal conditions and 8ml for severe conditions. Easy to mix in cold water and easy to apply through an inline dispenser.

BLOATBUSTER

This is a premium-grade alcohol ethoxylate product. BloatBuster is suitable for drenching and trough treatment. It has a 4ml dose rate, with 7ml for severe conditions. It is particularly strong on duration of protection after drenching, with most people using it once a day for at least some of the time (the exact duration of protection varies with the conditions, and from herd to herd, but the product is noted for its long period of effectiveness).

ANTI-BLOAT PLUS

This is a nonylphenol ethoxylate, which we've sold virtually for 20 years. The "plus" stands for added solubilisers, which makes the normal dose rate a very low and reliable 4ml, and which also makes the product work very fast. Anti-Bloat Plus also provides good duration of protection, with once a day treatment being common in reasonable conditions. This product is also suitable for drenching and troughing.

ANTI-BLOAT No 2 - BEST PASTURE SPRAYER

This is also a nonylphenol ethoxylate, but without the added solubilisers. That means it has to be pre-mixed with some warm water, and also that the drenching dose rate is 7ml in normal conditions. However, where Anti-Bloat No 2 shines is as a pasture spray. You just mix 7ml per cow with warm water, add enough cold water to allow coverage of the paddock with your spray gear, and Bob's your uncle. The water part of the mix quickly evaporates off after spraying, leaving just the active material stuck on the pasture leaf. And because it's cold again and not cold water soluble in that condition, it is exceptionally rain fast. In fact, many people successfully spray several paddocks ahead of the cows at one application, confident that the treatment will survive any rain short of "hosing down"

This now brings our range of bloat products to four so whatever the situation is we have a bloat product to cover it. Remember you can pasture spray with all our bloat products but Agmax's product Antibloat number two is the only true pasture sprayer in the industry. All other products including our other three can be pasture sprayed but get washed away in the first rain. Anti Bloat number two is not cold water soluble therefore it can withstand rain as long it's not cyclone bola.

MILK QUALITY

What's new in Milk Quality? You maybe expecting to hear about the correct cleaning routine, looking for the problem areas in the plant and the vat, milk soil deposits, how to clean the vat, checking rubberware, pulsators, water flow, and how to treat bug infested water. Instead of that I have taken a different approach. The emphasis this time is to focus on what chemical product actually get's rid of and removes milk soil. Why? Because milk soil residue is what causes grades and grades cost you lots of money. And it is understanding what these products do and why you use them that will prevent grades and save you money. These products are called...

THE GRADE BUSTERS

Vat Cleaner

The most amazing invention since sliced bread. We have taken the alkali powder and through magic and pure genius have created this caustic chlorinated alkali gel. The only one of its kind on the market. This product cleans more effectively as it sticks to surfaces and therefore has greater contact time. Hence it was originally invented to be rolled onto vat walls and left for ten to fifteen minutes simply wash off with cold water, no hot water required and presto any organic material will have been nuked. That is, any milk fat and protein will have been eradicated. Remember no fat, no protein therefore no bacteria can live there because there is no food source, therefore no grades. We have since found other dynamic uses for Vat Cleaner.

Uses

- 1 Roll onto vat walls and floors.
- 2 Dynamic for putting on the end of a brush with a filter sock and scrubbing the milk line. Remember it sticks and stays around creating contact time getting rid of stubborn baked on milk soil.
- 3 **Another dynamic use for Vat Cleaner is to pour some into your vat wash. It foams furiously creating fantastic contact time in the vat as the foam sticks to the walls. Note this idea came from one of our customers and many other customers have used it since and rave about it.**
- 4 **For the adventurous put some vat cleaner in the plant wash. It creates tremendous foam and contact time again. The only issue is it may flood the sanitary trap.**

Alkali

The preferred chemical to eradicate, eliminate, get rid of, destroy, annihilate and blitz milk soil is Agmax Alkali. Milk soil has two major components. Milk fat and protein. Acid detergents are very poor cleaners of these two

components at the best of times. Alkali which is made up of chlorine and caustic soda and other secret ingredients is the supreme chemical for getting rid of milk fat and protein. Why? Because caustic soda gets rid of fat and chlorine gets rid of protein. Don't believe me? Try it in your kitchen. Drop a blob of butter into some hot alkali in a cup and see what happens. It disappears. Drop the same blob of butter into some acid even some neat acid and see what happens. Very little. It doesn't disappear it simply sits there and floats.. Get my point.

However, people like to skimp on alkali because it involves too much hard work. That is, you have to do an Acid detergent rinse afterwards and it uses hot water.

Remember bacteria cause grades, chemicals don't. The only way bacteria can be in your plant is if there is milk soil in your plant. That is, it hasn't been cleaned properly. That is not the chemical fault. It is the fault of poor cleaning action in the plant and people not doing their job properly.

Uses

For plant and vat washes.

Note:

- * This alkali comes in a fantastically sealed pre-measured sachet. The chlorine and caustic soda stay intact, it doesn't go off and degrade as it does in loose alkali powder in buckets.
- * No measuring, no spills, no waste.
- * Sachets retain full alkali strength for years.

Chlorine

The protein buster. This is your weapon for getting rid of protein. That is chlorine eliminates and gets rid of protein in your plant and vat. Thermodurics love living in protein. Get rid of the protein, get rid of the thermodurics therefore no grade.

Uses

- 1 Add 200 – 250 mls of chlorine per alkali wash in plant and vat when required
- 2 Also use for getting rid of organic slime and gunk on shed walls and concrete floors, spray on wash off

SPRING SPECIALS

All of these specials are available until 5th November or while stocks last

Glyphosate Weedspray

Spray out paddocks prior to resowing pasture and the drain and you might as well nuke any other weed that's sticking its head above ground

2x 20 litre	Normally \$130 each ie: \$260 for 2	Special price \$110 each ie: \$220 for 2	save \$40
200 litre	Normally \$1099	Special price \$975	save \$124

(inclusive of GST and delivery on farm)

Met 600 Special

Tackle your brush weed on farm (same as Escort™)

200 grams	Normally \$52	Special price \$42	save \$10
500 grams	Normally \$72	Special price \$62	save \$10
1kg	Normally \$112	Special price \$92	save \$20

(inclusive of GST and delivery on farm)

Here is some technical information you need to know.

- 1 We are getting rave reviews from our customers but in particular our commercial sprayers who are over the moon at how well our Met600 mixes in with water. Not only is it highly soluble but it leaves far less residue than other brands. The benefit of this is that it doesn't clog up spraying nozzles.
- 2 It's a perfect time to spray now for all your woody weeds such as gorse, blackberry, bracken etc.
- 3 So go and attack your drains with a mixture of our MET600 and Glyphosate for outstanding results.

Weta

- * Tank added wetter to improve the effectiveness of glyphosate
- * Better penetration, faster kill, lower rate, reduce rain risk
- * Dilution 100 mls/100 litres of spray

5 litre	Normally \$62	Special price \$52	save \$10
20 litre	Normally \$215	Special price \$185	save \$30

Focus

- * A superior organosilicone penetrant for improved glyphosate kill of woody plants.
- * A must add penetrant for bracken broom gorse sweet brier and rye grass.
- * Dilution 100 mls/100 litres of spray
- * Reduce rain risk period from 6 to 2 hours

5 litre	Normally \$210	Special price \$190	save \$20
20 litre	Normally \$767	Special price \$700	save \$67

Stockfood Supplement

Compare the amazing value of this maize by product with some other nutritional supplements on the market.

The cows love this stuff, full of minerals, amino acids and protein. Agmax Stockfood Supplement is a concentrated, palatable nutritional supplement intended to assist stock in stress conditions. An amazing nutritional supplement pick me up. Customers report stock energy levels up, glossy coats, no staggers and increased production. One downside don't trough it because it's organic and ferment.

The typical analysis of the product is:

Total Solids..... 52%	Crude Protein . 25%
Carbohydrates.... 6%	Nitrogen..... 4%
Magnesium 2.5%	Potassium..... 2.5%
Phosphorous ... 1.5%	Sodium..... 1.5%

Plus various minor trace elements, amino acids and B group vitamins

20 litre	Normally \$109	Special price \$79	save \$30
200 litre	Normally \$549	Special price \$479	save \$70

HEMECARE PRODUCTS

ZEOSOFT HANDCARE

Hardworking Hand Cleaner

300g tube...\$10 4.75kg jerry can...\$69

Heavy Duty Hand Cleaner

Especially for grease and stubborn stains

600g tub...\$16 2.5kg pail...\$43

These Zeosoft hand cleaners are for the home, garden, boat, tractor and the milk shed.

- Made from soft natural minerals unique to New Zealand.
- Removes odours including fish smells and toxins
- Hands are clean, supple and refreshed.
- Environmentally friendly.

Work Soap

Antiseptic, anti-bacterial, perfumed, heavy duty flowing soap. A concentrated formula that only requires small quantities to be effective.

Uses: For removing grease, graphite, garden soil, etc. Is effective in salt water and ideal for boating, yachting and camping.

5lt...\$40

AUTOMATIC DISHWASHING POWDER

High performance powder that sanitises as it cleans. Just add small amount to the dispenser. For use in automatic dishwashers.

Biodegradable, concentrated, easy to use.

HERD OVER THE FENCELINE

POLITICS

Breaking news - David Garret – To quote Jane Clifton, political reporter “What is

it about these people who enter public life with a ‘Walter Mitty’ complex?

That is they all have multiple fantasy lives. Just like those high and mighty people that preach one thing but practice another. Namely, Rodney Hide the self proclaimed perk buster who was found wanting as he ripped off the system. Isn't it just the way of life? At least the current Prime Minister John Key and the previous Prime Minister Helen Clark appear to be free of skeletons in their cupboards. Watch this space to see what skeletons tumble out of the political cupboards on the next round.

Go the Cantabs

Now I have never been known to support the Cantabs over rugby. However, our thoughts and support have been right behind this earthquake that unfortunately happened to our ‘Mainland Mates’!

Our Christchurch depot was severely damaged with the earthquake. We have had to support these guys who took two weeks to simply sort out the carnage of twisted and buckled racking and cleaning up all the damaged and spilt dangerous goods.

Thanks to our South Island customers for your patience as the depot is now able to process orders and get them out. NB It will take a while to get it back to normal.

SPORT

RUGBY

Go the ALL BLACKS: A win is a win and we cleaned out the Tri Nations. Let alone the Bledisloe Cup. Nothing feels better than beating the Boks and the Wallabies particularly in their own backyards.

RUGBY LEAGUE

The hard luck story of the season. It just shows how important it is to win the easy games, earlier in season and then the Warriors had to wait for one of two teams to lose so they could make it through to the top 8, and would you believe it both of those teams won!. Exit the Warriors.

TENNIS

Rafael Nadal has entered the hallowed hall of fame of winning 4 grand slams in one season.

NETBALL

Come on the Silver Ferns. We need to play with intensity and passion when we whipped them by 19 goals all of the time. Next stop Commonwealth Games.

CRICKET

All you need is a good bookmaker preferably and Pakistina

DIRECT CREDIT INTO OUR BANK ACCOUNT!

More and more people are paying by direct credit every month. Easy for you no cheques and postage and easy for us. Agmax's bank account number is:

ASB 12-3237-0008733-00

THE LAST LAUGH

Sitting together on a train travelling through the Swiss Alps were a Kiwi guy, an Australian bloke, a little old Greek lady, and a young blonde Swiss girl with large breasts.

The train goes into a dark tunnel and a few seconds later there is the sound of a loud slap.

When the train emerges from the tunnel, the Aussie has a bright red hand print on his cheek.

No one speaks.

The old lady thinks:

The Aussie guy must have groped the blonde in the dark, and she slapped his cheek.

The blonde Swiss girl thinks:

That Aussie guy must have tried to grope me in the dark, but missed and fondled the old lady and she slapped his cheek..

The Aussie thinks:

The Kiwi bloke must have groped the blonde in the dark. She tried to slap him but missed and got me instead.

The Kiwi thinks:

I can't wait for another tunnel, just so I can smack that Bloody Aussie again.
